

CROSSBOW TRADING PORTFOLIO (USD)

Report May 2025

Strategy description

The Crossbow Trading Portfolio seeks to deliver stable returns of Libor + 4-6% per year with low correlation to equity and fixed income markets, providing an attractive diversification to traditional portfolios. The Portfolio invests primarily in Macro Trading strategies, which are predominantly directional across asset classes and implemented by Global Macro and CTA managers. The Portfolio can be complemented by less directional, Relative Value oriented Trading strategies such as Fixed Income Arbitrage and Equity Market Neutral. These exposures to specialized managers result in a Portfolio diversified across sub-strategies, investment styles, asset classes, regions and time horizons without any long or short bias.
