Strategy description

The CB Greater China Portfolio invests in long/short managers in Asia and aims to beat the MSCI AC Asia Pacific Index and the MSCI China Index over the medium term with significantly lower risk (volatility). By investing in specialist China/Asia funds, investors gain access to companies that derive the majority of their revenues from China and which operate in industries that capitalize on favorable structural growth opportunities, from localization and from strong domestic consumer demand. The combination of a diverse set of portfolio managers provide a well-diversified stream of both alpha and beta returns. The beta of the portfolio will be below 0.5 in average and a good portion of the returns will be derived from superior stock picking on the long and short side (alpha). The certificate invests in offshore and UCITS funds that are strictly regulated. It offers monthly liquidity with a notice period of 35 days.
